## [Corruption in the EU Delegation to Albania](#)

By a decision of May of 2014 the EU Delegation has granted 4 millions euros for the new project Euralius IV to a consortium led by Germany, with participation of Austria. Euralius is a mission of **technical assistance** for supporting reform of justice.

In this way the project is back to the same consortium that was leading it during Euralius I and II with big budget but little results in transforming Albanian justice system.

The decision of the EU Delegation is purely political and obviously against EU laws and rules. In different conversations, experts and officers of EU Delegation have recognized that the other proposal (led by Spain, with participation of Italy and France) was technically much better and more convenient for reform of justice. However they justify the decision in political pressures received from the current SP Albanian government. There are evidences of such conversations. However lately, being aware of have committed a fraud the same officers start to say in public that the winning proposal was better written.

According to the EU officers the current government thinks that by granting these 4 millions to Germany it will be more easy to get German support to the Albanian candidacy for EU. This political interest has been more decisive than any technical concern. More decisive than the respect of rules of EU regarding grant of funds.

The following posts will include a report on the two offers received, on the procedure followed by the requests and on the irregularities committed by EU officers in this issue. Here is just an advance:

### -The two proposals

The following table compares the two proposals:

	NOT SELECTED	SELECTED
Duration	48	40
Experts	10	5

## About Me

### [Euralius Team](#)

Tirana, Albania

This is a project if funded by the European Union though the IPA funds. The contract was awarded a month prior to this date to the Spanish Ministry of Justice that is acting through the FIIAPP in consortium with the Italian Council of Magistrates. The overall objective of the project is to bring the Albanian Justice System closer to EU standards through technical assistance drawn from EU Member States. EU intends through this external action to support the reform of judicial system in Albania in compliance with the priorities of the European acquis in Judiciary and Fundamental Rights and European best practices and standards in the area.

Yes. They have chosen the worst. for the same money, the EU prefers to have 40 months of technical assistance rather than 48 (the call of applications allowed from 40 to 60 months). They prefer to have less experts and less adequate to the profile. In short, they have chosen the most convenient politically to the interests of some EU officers, rather than the most competitive offer.

#### **-The procedure**

The call of applications was already published irregularly. The call gave only a deadline of two months for presenting applications. it is an urgent procedure. For doing so the EU Delegation needed an authorization from the EU Commission that was never requested. So, the call for proposal was legally wrong from the very first moment.

The applicants had two months for presenting their proposals. The EU delegation took more than two months for deciding on a candidate, so that obviously the procedure was not so urgent. The two months of internal decisions were used for trying to find a justification for an unjustified decision.

The EU delegation selected a very unusual evaluation committee:

\* One person from EU Commission. Mr. Kostantinos NIAFAS, working in the DG of Enlargement, in the section of Albania. It is very unusual to have a member of the evaluation committee coming from Brussels. indeed it is the first time happening. the reason is that the EU commission has to supervise later the process of evaluation, so for being neutral it should not be involved in it from the beginning.

Also Mr. NIAFAS is not dealing with justice and home affairs but with other issues as properties and fight against corruption. The officer dealing with justice was not selected. probably because her bosses considered that she could be objective and in favor of the best candidate. Mr. NIAFAS is a person of the maximum trust of Mr. Vassilis Maragos, head of all this unlawful operation.

\* One expert from the EU Delegation. Mrs. Lora UJKAJ, working as project manager. In the moment of being selected Mrs. UJKAJ was coming back to Albania after a leave of one year. She was not familiar with situation of justice in Albania and was looking for a job in Tirana for her husband.

The program manager who was in charge of justice was not selected for the evaluation committee. Probably for avoiding any body which could be objective in the process. During the evaluation procedure her husband was also hired at the EU Delegation.

\* One representative of Ministry of Justice. Mrs. Edlira JORGAQI, general director of codification. She did not participate in first meetings as it was too technical. Then from the first day she arrived, before studying the proposals, said that the Government preferred the German one, for political reasons. She did not dare discussing the merits of every proposal, but merely transmitted a political decision which is totally against EU rules of transparency and fair competition.

This weird evaluation committee had only few meetings, as one of the members is based in Brussels and he could come only few times to Albania... however the process took more than two months.

When the evaluation committee presented their report it was refused by the head of operations of the EU Delegation. The members of the evaluation committee were asked to re-draft report.

This is illegal, as it means a clear indication of the heads to the committee of evaluation about what to put in their report, which is not longer independent. The reason for asking for a second report was that the first one was not rightly motivated and it could easily allow a claim.

So, the heads of the delegation saw that it was too obvious that the 4 millions euros were being granted by personal interests instead of based on the merits of proposals and asked to re-draft it in a better way. Indeed the representative of Ministry of Justice understood that the claim was already presented and drafted a second evaluation report as answering a claim.

A very irregular and obviously illegal procedure aimed exclusively at trying to justify a corrupted decision.

#### **-Additional irregularities.**

The entire procedure was unlawful and full of mistakes. But there are some additional irregularities which help to understand better what happened and how clear is this case of EU fraud.

It is interesting to realize two of them:

##### **\*The hiring of the husband of Mrs. UJKAJ.**

As she has just moved back to Albania, the husband of Mr. Lora UJKAJ had no work in Albania. During the evaluation process the Delegation published a vacancy for a position of political officer. The call of applicants was published among embassies, so that the deadline passed before the husband could apply. So they managed for re-opening the call with only purpose of granting the position to him. He got the contract and Mrs. UJKAJ had a new reason for being obedient for the rest of the evaluation procedure. Apparently it seems as a possible case of corruption.

##### **\*Political questions in the evaluation process**

The evaluation process included a presentation of the two proposals. There, one of the members of the evaluation committee made a question showing their illegal intentions. She asked if the project offered only technical assistance (is the only purpose of the project) or was also able to offer additional political support to Albania as the other candidacy. In this moment the evaluation process should have been suspended as it was obvious that some of the members of evaluation committee were not judging according to the call for proposals.

#### **-Possible reasons**

The main question is, why the EU will give 4 millions of euros to the weak technical proposal? It is difficult to answer the question. In principle, every one of the officers participating could have a different interest.

\*Personal interests. Like getting a contract for your husband, or showing loyalty to your boss for being preferred in future promotions.

\*Albanian interest. Albania wants the German proposal because some wrong adviser has told to Prime Minister that giving money to German experts and having German experts here could push Germany for voting for Albanian candidacy, even if Albania may not deserve the status of candidate.

\*European Commission interest. Commissar FULLE is ending his mandate in next months. Getting the candidacy for Albania has been presented by him as a way of showing his strength in front of member states. If he manage to convince member states, he may have a personal political future in EU. So he thinks that giving the 4 million project to Germany will help his personal ambition and purposes.

Obviously all of this reasons are illegal. In all the cases the money of EU is being used for personal interests and not for the purpose legally settled up by EU. This is a fraud, and a clear case of corruption.

## **[EU Delegation press release about Euralius](#)**

**The new €2.3 million project funded by the EU to support the strengthening of the rule of law in Albania was officially launched today. The project "Consolidation of the Justice System in Albania" (EURALIUS) will assist the Albanian Ministry of Justice and judicial institutions to develop an independent, impartial, efficient, professional, transparent and modern justice system, therefore contributing to the restoring of people's confidence in their institutions and to the consolidation of democracy and rule of law in the country.**

The Opinion and Analytical Report recently published by the European Commission re-emphasised the importance of the rule of law and justice reform for Albania's accession. The Council of the EU has endorsed the Opinion of the Commission and reaffirmed that future evaluation of Albania will be focused on the twelve key priorities outlined by the Commission, including strengthening of the rule of law, and justice reform.

The project "Consolidation of the Justice System in Albania" has brought to the country 5 long-term international experts from different EU Member States, who together with 2 local experts, will work during the coming 30 months on Justice Organisation and Justice Reform, Modernisation of the Judiciary, Enforcement of Rulings, Court Administration and Case Management, Criminal Justice and Participation.

During the launch ceremony, Chargé d'Affaires of the EU Delegation to Albania, Mr Luigi Brusa noted that "reforming the justice system cannot be patchwork. It cannot be done upon *ad hoc* decisions. The rule of law needs to derive from a comprehensive vision and an all-encompassing strategy towards the goals of transparency, accountability and efficiency". Speaking of the importance of the

rule of law for a functioning democracy, he added that "there is no such thing as a 'majority rule of law', or an "opposition rule of law". Broad political consensus between political forces on judicial reform is a necessary condition for progress".

The project is being implemented by the Spanish Ministry of Justice in consortium with the Italian High Council of the Judiciary.
