Greetings Mr. Likmeta,

The original project we proposed to the Albanian GDT was based upon the VAT Raffle solution. For this to work new POS devices were required to be introduced in the market (not necessarily by M.POS although we proposed few versions of our own together with few fiscal registers). Our team from Hong Kong made the first approach and presented our solution, which I need to emphasize is tested in different countries with success. The discussion was followed later on Albania by our local partner MCN. During these discussions the project has been extended in order to better apply to the Albanian situation since of course each country has its own particularities. I am aware that in particular the project now is compliant to EU directive on e-invoices and some OCDE guidelines for accounting software. among other things.

Our Group, here in Hong Kong, and our partner in Tirana, are totally aware of the sensibility of data privacy. Our solution is entirely compliant to Albanian laws (9987/2008 among others) and of course we will comply to those laws for the all the duration of the PPP. The law is our warranty.

M.POS Hong Kong together with our local partner will be using a SPV company in Albania as it is customary for these kind of projects. That will be a 100% Albanian company.

No, I strongly affirm that there are no politicians linked to our project. This is a technological project with the main aim to help Albanian GDT to improve its capabilities to collect VAT (although indirectly GDT will also be collecting other taxes much better than today).

As I mentioned above our partner is MCN.

Best regards,

Allen Cheng

Chairman
